## Tumble Dryers

**NOTE:** THESE DATES ONLY APPLY TO TUMBLE DRYERS, AND NOT TO ANY OTHER CATEGORY OF PRODUCTS COVERED BY ENERGY LABELLING AND ECODESIGN LEGISLATION.

1<sup>ST</sup> OF MARCH 2025

1<sup>ST</sup> OF JULY 2025

31<sup>ST</sup> OF MARCH 2026

## Ecodesign

ON THE **12<sup>TH</sup> OF DECEMBER 2023**, A NEW ECODESIGN REGULATION FOR TUMBLE DRYERS (EU) 2023/2533 HAS ENTERED INTO FORCE. MOST PARTS WILL APPLY FROM THE **1<sup>ST</sup> OF JULY 2025**.

### Since the 12<sup>th</sup> of December 2023

The provisions on **circumvention** are in force.

Designation “**Eco**” can be used instead of “**standard cotton programme**” on the programme selection device or display of the tumble dryer, if you make sure until the 30<sup>th</sup> of June 2025 that booklet for users and technical documentation refer to the standard cotton programme.

### From the 1<sup>st</sup> of March 2025

**Compliance of new models** (including equivalent models) with the new regulation (EU) 2023/2533 is sufficient, no need to check compliance with (EU) 932/2012 for such models.

All other points of the ecodesign regulation (EU) 932/2012 will still apply for all tumble dryer units placed on the market before the 30<sup>th</sup> of June 2025.

**From the 1<sup>st</sup> of July 2025** most provisions of the new regulation will apply, which include, among others:\*

- Availability of a supplier's free access website.
- Availability of spare parts, procedures to order them and maintenance information.
- Requirements for software updates.

### From the 1<sup>st</sup> of July 2025

**Only tumble dryers** (models with capacity above 3kg) featuring **heat pump technology** will be allowed to be placed on the EU market.

## Energy label

ON THE **1<sup>ST</sup> OF JANUARY 2024**, A NEW ENERGY LABELLING REGULATION (EU) 2023/2534 HAS ENTERED INTO FORCE. MOST PARTS WILL APPLY FROM THE **1<sup>ST</sup> OF JULY 2025**.

### From the 1<sup>st</sup> of January 2024

The product information sheet can be made available via EPREL instead in printed form unless the dealer requests it in printed form.

### From the 1<sup>st</sup> of March 2025 suppliers shall:

- Supply each household tumble dryer with a printed energy label following the new regulation. The current energy label has to be delivered as well until the 30<sup>th</sup> of June 2025, but shall not be provided for models placed on the EU market after the 30<sup>th</sup> of June 2025.
- Enter the values for the parameters of the new product information sheet into the EPREL database and make the energy label and the product information sheet available in the public part of EPREL.

All other points of the energy labelling regulation (EU) 392/2012 will still apply for all tumble dryer units placed on the market before the 30<sup>th</sup> of June 2025.

**Products that are placed on the market before the 1<sup>st</sup> of March 2025** can be sold indefinitely provided that they are supplied with a rescaled label.

Only if a supplier has ceased its activities, the dealer is allowed to sell the products with the old label for a period of nine months – at the latest the 31<sup>st</sup> of March 2026 (in accordance to Article 11 point 13.(b) (i) of Regulation 2017/1369).

DISTRIBUTION OF  
THE CURRENT ENERGY LABEL

DISTRIBUTION OF  
THE CURRENT AND THE NEW ENERGY LABEL

DISTRIBUTION OF  
THE NEW ENERGY LABEL

1<sup>ST</sup> OF MARCH 2025

1<sup>ST</sup> OF JULY 2025

\*subject to changes in accordance with the amendments to the ecodesign regulation [see Draft Regulation amending Commission Regulation (EU) 2023/2533 laying down ecodesign requirements for household tumble dryers]

THIS CALENDAR HIGHLIGHTS SELECTED REQUIREMENTS THAT SUPPLIERS SHOULD PAY SPECIAL ATTENTION TO. PLEASE REFER TO OUR PROJECT PORTAL AND FULL ENERGY REGULATIONS (EU) 2023/2534 AND 2023/2533 FOR ALL REQUIREMENTS.
